
DynamiPEAK™

Peak Flow Meter - P/N 10-1000

Technical Specifications

Range:	60-900 l/mn
Scale Increment	10 l/mn
Accuracy :	<+/- 10% or 20 l/mn
Repeatability:	<+/- 2%
Calibration:	100% (individual unit)
Frequency Response:	c100Hz @ 350 l/m
Dynamic State:	Critically damped @ 350 l/m
Standard Compliance:	EN/ISO 23747:2007 ATS 1994 Spirometry Standards AS/NZ 4237 NAEP Guidelines 1991 (ATS)

DynamiPEAK is the product of many years experience and design of some of the world's best known peak flow meters, DynamiPEAK has many built-in features including:

- color zones for asthma management which won't wash off
- internal check value, minimising cross-infection concerns
- large high-visibility scale
- captive pointer
- available with EU or ATS scale

This is the first peak flow meter to be designed specifically to conform to the new International Standard requirements, and each unit is individually calibrated and tested for accuracy.

DynamiPEAK is made from top quality medical-grade polymers and stainless steel for durability and stability of accuracy.

An ideal reliable tool for the management, monitoring, and assessment of respiratory conditions such as asthma; DynamiPEAK comes complete with detachable mouthpiece, a one-month peak flow chart, instructions for use and easy-to use guide to normal peak flow values.
